Water Extraction and Structural Drying

Water leaks or spills are very common. Immediate inspection of floor coverings, structural materials and crawl spaces, as well as prompt removal of all standing water, is critical to reduce or eliminate structural damage and/or mold.

Since every minute counts, Our Water Extraction Team is ready to respond 24 hours a day, 7 days a week. No matter when a flood occurs, we will be there to bail you out. 24 / 7 Emergency Water Extraction and Water and Flood Removal Dallas, Allen, Frisco, Plano,TexasCoverage for all areas of the Dallas Fortm Worth Mapsco

(214) 556-3537 (817) 945-3707

Emergency WATER and FLOOD REMOVAL, 24 / 7 Emergency Water Extraction and Water and Flood Removal Dallas, Allen, Frisco, Plano,Texas

After all standing water has been removed, the structure must be thoroughly dried to prevent moisture damage or mold growth. Moisture meter identifies presence of moisture on and below surfaces⚓

Homeowners sometimes remove standing water themselves, then neglect to have the area professionally dried because the surfaces look dry or feel "dry to the touch." However, without the proper equipment, it is impossible to determine how much moisture is still within the structure or to draw that moisture out before it cultivates mold or causes other structural damage.

Increased moisture in the air after an indoor flood can cause "secondary" damage to decorative wood, books, artwork and other items, so thorough drying and dehumidification are critical.

What To Do When Water Damage Occurs

In most cases, only a professional can repair water damaged flooring and furnishings. Do not attempt to treat these items yourself. That may only contribute to the problem and cause further damage. The following actions are suggested to minimize damage while waiting for help to arrive.

Foremost, stop the water leak and attend to obvious safety hazards, like electrical shock and personal injury from slips and falls. 24 / 7 Emergency Water Extraction and Water and Flood Removal Dallas, Allen, Frisco, Plano, FortWorth, Texas.

Contact Water Damage Restoration Services. Protect and preserve your home and furnishings from the destructive effect of water. Trained technicians, using professional inspecting and drying equipment can identify hidden water pockets and dry both your structure and furnishings to acceptable industry standards. We are an SCC Certified Firm. 24 / 7 Emergency Water Extraction and Water and Flood Removal Dallas, Allen, Frisco, Plano, Texas. Call Now
